

# TRACK YOUR VALUABLE ASSETS

# With **QTRMaster** RFID Solution

# Loan Filtering

**The Basics** 

2024-02-01

#### Release 1.4.0-68:

In order to evaluate the performance of "store" room locations as well as quickly reference all transactions that are recorded by borrowers using the 'touch' terminals within your equipment rooms, we have augmented our software to allow for filters within the main "LOAN" page: These additional filters are "Location In", "Location Out" & "Last Seen"

#### Location 'IN'

Selecting the 'Location In' filter will also list two extra fields "Item Damaged" and "Item Returned"

These options relate to the touch screen terminal usage at the equipment rooms and will display all transactions where the borrowers engaged the touch screens to report items which are not 'seen by the reader' as returned with their original transaction, however HAVE been returned.

### Loan Filtering

**Location In:** Choose the 'Store' (room) reader you wish to monitor and the QTRMaster system will display all activities 'direction in', past and present, from selected 'Store' (room) reader.
